

Custom Water Installation Questionnaire (CWIQ)

This questionnaire will provide our water system engineers with important information about your water needs. This information will allow us to design and quote a system to satisfy your water needs above and beyond our standard system.

Name: _____

Organization: _____

Address:

Country: _____

Is this address your home or organization (Please Check One).

Phone Number: _____

Project location: _____

Project country: _____

Project area: _____

Project geographical coordinates:

Latitude: _____ Longitude: _____

Current water source (Please indicate well, pumped groundwater, bucket fed groundwater, river, stream, pond, etc. Please be as descriptive as possible) : _____

Are you currently using a holding tank? Yes or No . What type of water storage tank exists?

Clean Water Installation Questionnaire (CWIQ)

Page 2

Specific contaminants (examples include arsenic, fluoride, nitrates, bacteria, viruses, animal waste, etc)

Does your project site have access to a reliable power grid? Yes or No .

If yes, what is the voltage from source? (110v, 120v, 220v, 230v etc.): _____

What is the frequency from source? (50hz, 60hz) : _____

Do you require extra power? Yes or No . If Yes, how much? _____

What is your required water output? (This can be a number of people or a volume per time (ex: 50L/hr). Please use units.) _____

Are there any specific barriers to import we need to be aware of? Yes or No . (Please detail if yes): _____

How will clean water be stored? (buckets, municipal pipes, bulk water storage tank, etc):

What is the budget for this project? _____

Are there any timeline constraints we need to be aware of?

Is there anything else you feel we need to know about your installation specifically that is not covered?

++Please note for custom systems, you will be asked to provide color photos as well as sketches with measurements before project finalization.
